Website Report 2026

Trafford Ramblers Group

Our website continues to operate smoothly thanks to the technical support provided by Ramblers volunteers, who maintain our website and many other Ramblers group websites. They update the system when necessary and are always available to resolve any issues, including website outages or technical problems.

Our walks programme is automatically downloaded from the Ramblers Walks Manager. I continue to add and update pages on the website, generally using a copy-and-paste approach where appropriate, and I include links to relevant information whenever possible.

I am always pleased to receive articles, photographs, or other items of interest from members for publication on the website.

I remain the only person with administrative access to the website. I would welcome a volunteer who would be willing to learn how the system works and assist with maintaining and updating the site.

Richard Longbottom
