

Website Report 2025

Our website continues to work smoothly thanks to the technical support from ramblers volunteers who have provided our website, and many other ramblers group websites. They update the system when necessary and will help sort out all problems such as website crashes.

Our walks programme is automatically downloaded from the Ramblers Walk Manager

I continue to add or change pages on our website, generally in a copy and paste approach and include links when appropriate.

I am still the only person with access, and I would be happy for a volunteer to support me.

Richard Longbottom
